WORK EXPERIENCE

Java Developer

4lines Infotech

04/2025 - Present

Achievements/Tasks

- Designed and implemented RESTful APIs using **Spring Boot**, enabling ~30% faster response times and improving overall throughput.
- Built microservices architecture to break down a monolithic system, reducing deployment failures by 40% and increasing release frequency.
- Integrated **Spring Security** (JWT / OAuth2) to secure endpoints; improved system security and reduced unauthorized access incidents.

Java Developer Intern

Signimus Career Initiative, Indore

11/2024 - 03/2025

Achievements/Tasks

- Completed a internship focused on Java backend development.
- Worked on real-time application modules under the guidance of senior developers.
- Gained hands-on experience with Java, Spring Boot, REST APIs, and database integration.
- Improved skills in writing clean, maintainable code and using Git for version control.

SKILLS

Java

Spring Boot

Microservices

Hibernate

Rest API

HTML

PERSONAL PROJECTS

Student Management System

- Java, Spring Boot, Spring Data JPA, Thymeleaf, MySQL
- Developed a full-stack web app to manage student records with CRUD operations.
- Designed RESTful services and implemented dynamic web pages using Thymeleaf.
- Used Bootstrap and JavaScript for a responsive UI.

Shopper Store (E-commerce Web App)

- Java, JSP, Servlets, Oracle DB, HTML, CSS, JS
- Built user login, registration, product search, cart management features.
- Implemented database interactions using JDBC and Oracle DB.
- Ensured responsiveness using media queries and frontend frameworks.

STRENGTHS

Calm under pressure and focused on quality output

Strong collaboration and communication skills
